Winter holidays in Norway

In order to ensure that your journey to and from your chosen ski destination is as safe and comfortable as possible, we would like to offer you some advice before you set off:

- Remember that the tread on your winter tyres must be at least 3 mm deep.
- Use the best tyres for the car's back wheels. This reduces the risk of skidding.
- Check that you have the correct air pressure in your tyres.
- Call the Norwegian Directorate of Public Roads on +47 815 48991 for up-to-date information on road, weather and traffic conditions.
- Pay attention while driving, as road and weather conditions can change rapidly.
- Adapt your speed to the conditions.
- Make that sure you keep at least four seconds behind the car in front of you.
- Give yourself plenty of time for the journey.
- Make regular stops. If you're feeling tired – Stop. Why not take a 15-minute nap before continuing?

Welcome – we wish you a safe journey and a great winter holiday in Norway!
